Subject: Application for Software developer/engineer

Dear Mr. Bora

I am writing to formally express my interest in the Software Developer/Engineer position at CADT. As a recent graduate with a Bachelor of Software Engineering from CADT, I am confident in my ability to contribute effectively to the Computer Science Department and uphold the high standards of your institution.

Throughout my academic journey at CADT, I had built a strong foundation in C/C++, Java and Python with practice in problem solving and software design. My six-month internship provided real-world experience in testing, debugging, and improving code quality, allowing me to apply theoretical concepts in a professional environment. I also accomplished several side projects including calculator application, interactive mini games, and inventory management systems which sharpened my skills in practical implementation and independent learning.

In addition to my academic experiences, I have also participated in many voluntary works to improve my leadership, teamwork, and communication skills. Many of my voluntary work involves charity such as Fun Run 4 Fund and Charity, an organizer at Pass It On Charity Market, as well as teaching English to students at the country sides. These experiences taught me to collaborate with people from diverse backgrounds, manage responsibilities effectively, and maintain professionalism in different environments.

I am motivated, disciplined, and enthusiastic about learning modern software development. I believe this position at CADT will allow me to grow while contributing positively to your organization. I would truly appreciate the opportunity to discuss my application further. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Soy Buntheoun

Department of Computer Science

Course: Introduction to Effective Business Communication

Instructor: Chun Bora, BBA, MSW

Group No: 8

Group members:

Chey Naryevty / Vorng Viseth / Lim Vinchay

(Note: Soy Buntheoun is Ty's alias which represents us three and our experiences combined)
